INTRODUCTION

Highly motivated software engineer with a goal-oriented mindset and a passion for software technology. Strong ability of problem solving and excellent communication.

EDUCATION

Arizona State University | MS Computer Engineering

Aug 2023 – May 2025

Foundations of Algorithms, Digital Image and Video Processing and Compression, Software Validation and Verification Testing, Information Assurance and Security, Data Mining, Cloud Computing, Python for Rapid Engineers.

University of Mumbai, India | BE Electronics and Telecommunications

June 2017 – July 2021

Image Processing and Machine Vision, OOP using Java, Neural Networks and Fuzzy Logic, Microprocessors and Peripheral Interfacing, Embedded Systems, Microcontrollers Interfacing, Discrete Time Signal Processing.

EXPERIENCE

LEAPS at ASU | Software Engineer

June 2024 – Present | Tempe, AZ

- Integrating a Talks chat framework to dashboard developed in Nuxtjs and Nestjs to enable discussion and ease maintenance.
- Developing automation scripts in python to foster alerts based on priority of maintenance required on the equipment.

Larsen & Toubro Infotech Mindtree | Senior Software Engineer

July 2021 – May 2023 | India

- Simplified third-party XML signature service by creating an efficient web API service using Nodejs.
- Led a Document feature integration team to incorporate "submit and sign application" to the react web app.
- Streamlined debugging async functions by implementing unit test cases using the Jest framework.
- Automated JSON creation through python script that in turn reduced manual labor decreasing overall efforts to enter data.

Botonomics Automations LLP | Trainee Backend Developer

May 2020 – March 2021 | India

- Implemented a single-click login functionality in collaboration with the backend team using Google, LinkedIn open APIs.
- Enabled a bot to communicate through a flask app with telegram using its open APIs.
- Effectively implemented integrations of Google Cloud Platform functions into the flutter app.

TECHNICAL SKILLS

Languages & Frameworks: Python, GIT, Java, Nodejs, Reactjs, Angular, SQL, C/C++, C#, .NET, Flutter, JQuery, Android, Django, Flask, Spring Boot

Cloud: Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP).

Tools and OS: Jenkins, Docker, SQL, Eclipse, Beautiful Soup, Scrapy, Maven, Pycharm, Microsoft Office Suite, Visual Studio, Visual Studio Code, Linux, Windows and Mac.

Web Design: HTML5, CSS3, JavaScript, PHP, AJAX, JSON.

PROJECTS

- **Bot Detection using Personality and Sentiment Extraction from Text:** Collaborated in a team to do a regressive analysis of social media textual content to detect bots and sentiments from them. (NLP, BeautifulSoup, Flask).
- **Deploy a Django App on AWS EC2 instance using Docker and Jenkins:** A Django todo app was dockerised and then using Jenkins deployed to an AWS EC2 instance. (AWS EC2, Docker, Jenkins, Django)
- **Covid Alert Bot:** A python script finds vaccination slots in the area recognized by pin code. (Python, smtplib, requests)
- **Covid Tracker:** An Angular Application that consumes a web API and displays the results in form of a chart using chartjs for all US states. (Angular, Material UI, Chartjs)
- **Pokemon Review API:** A web API developed using .net core and razor pages that displays custom pokemon data and review along with owner information with established many to many and one to many relationships. (C#, .Net Core, Razor, SQL)

CERTIFICATIONS

AWS Partner : Technical Accredited | Amazon Web Services

February 2023

- Developed fundamental, technical knowledge of AWS cloud computing, global infrastructure, services, solutions, migration and security.

Full Stack Developer | Larsen and Toubro Infotech Mindtree

October 2021

- Front-end Frameworks; APIfication with Microservices; Database (SQL & NoSQL); Code Quality; Cloud Deployment and DevOps.
