INTRODUCTION

Highly motivated software engineer with a goal-oriented mindset and a passion for software technology. Strong ability of problem solving and excellent communication.

EDUCATION

Arizona State University | MS Computer Engineering

Aug 2023 – May 2025

Foundations of Algorithms, Digital Image and Video Processing and Compression, Software Validation and Verification Testing, Information Assurance and Security, Data Mining, Cloud Computing.

University of Mumbai, India | BE Electronics and Telecommunications

June 2017 – July 2021

Image Processing and Machine Vision, OOP using Java, Neural Networks and Fuzzy Logic, Microprocessors and Peripheral Interfacing, Embedded Systems, Microcontrollers Interfacing, Discrete Time Signal Processing

EXPERIENCE

Larsen & Toubro Infotech Mindtree, Mumbai, India | Senior Software Engineer

July 2021 – May 2023

- Simplified third-party XML signature service by creating an efficient web API service using Nodejs.
- Led a Document feature integration team to incorporate “submit and sign application” to the react web app.
- Streamlined debugging async functions by implementing unit test cases using the Jest framework.
- Automated JSON creation through python script that in turn reduced manual labor decreasing overall efforts to enter data.

Botonomics Automations LLP, Mumbai, India | Trainee Backend Developer

May 2020 – March 2021

- Implemented a single-click login functionality in collaboration with the backend team using Google, LinkedIn, and FB open APIs.
- Enabled a bot to communicate through a flask app with a telegram bot using its open APIs.
- Effectively implemented integrations of Google Cloud Platform function into the flutter app.

TECHNICAL SKILLS

Languages & Frameworks: Python, GIT, Java, NodeJS, ReactJS, Angular, SQL, C/C++, C#, .NET, Flutter, JQuery, Android, Django, Flask.

Cloud: Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP).

Tools and OS: Jenkins, Docker, SQL, Eclipse, Beautiful Soup, Scrapy, Maven, Pycharm, Microsoft Office Suite, Visual Studio, Visual Studio Code, Linux, Windows and Mac.

Web Design: HTML5, CSS3, JavaScript, PHP, AJAX, JSON.

PROJECTS

- **Bot Detection using Personality and Sentiment Extraction from Text:** Collaborated in a team to do a regressive analysis of social media textual content to detect bots and sentiments from them (**NLP, BeautifulSoup, Flask**).
 - Developed three different web scrapers to extract data from multi-platform websites using beautiful soup package.
 - Trained several models using logistic regression and then SVM binary algorithm using the data sets.
 - The project was part of a research project to prove a hypothesis if we could detect personality of certain bots on social media.
- **Deploy a Django App on AWS EC2 instance using Docker and Jenkins:** A Django todo app was dockerised and then using Jenkins deployed to an AWS EC2 instance. (**AWS EC2, Docker, Jenkins, Django**)
- **Covid Alert Bot:** A python script finds vaccination slots in the area recognized by pin code. (**Python, smtplib, requests**)
 - Leveraged python's SSL, smtplib packages to send emails.
 - This was built in an effort to manually check slot openings on the portal and streamline vaccination slot booking for me.
- **Covid Tracker:** An Angular Application that consumes a web API and displays the results in form of a chart using chartjs for all US states. (**Angular, Material UI, Chartjs**)
- **Pokemon Review API:** (**C#, .Net Core, Razor, SQL**) A web API developed using .net core and razor pages that displays custom pokemon data and review along with owner information with established many to many and one to many relationships.

OTHER WORK EXPERIENCES

Arizona State University, Tempe, AZ | Instructional Aide

September 2023 - Present

- Undergrad Instructional Assistant for GIT:215 Intro to Web authoring Help students with queries in HTML and CSS concepts, Assist professor with grading and evaluations.
